MANAGEMENT OF OUR HOA

After extensive research and planning, the Silver Creek Home Owners Association Board of Directors has decided to join the many other HOAs that manage their own business affairs rather than pay for the services of a contract property manager.

The potential advantages of self-management include:

- Significant cost savings
- Faster response to reported issues
- Simplified communication
- Increased sense of community

This move is a vote of confidence in the Association's shared sense of community because our success will depend on everyone's commitment to manage themselves according to the governing documents of Silver Creek.

This change will necessitate greater involvement on the part of the Board of Directors and Association Committees. You are invited to pitch in!

As you would expect, there will be a few adjustments to some familiar procedures, but your elected board believes the benefits will be worth the effort.

It is anticipated this transition will take place January 2025. Nothing changes until then.

The Board expresses its appreciation to Community Association Management (CAM), for the services it has provided us in the past and will continue to provide through the end of the year.

In December, you will receive instructions to register for a new user-friendly on-line Owner Portal that will be a one-stop resource for all matters relating to your Silver Creek home.

You will also receive instructions for the new procedures for dues payments effective January 2025.

In the meantime, if you have any questions, please send them to silvercreekfaq@outlook.com. Each question will receive a response.

ARCHITECTURAL RULES, SIMPLIFIED!

Homeowners will welcome the following clarified and simplified rules adopted at the HOA Board's October meeting.

Copies of the rules are attached to the meeting minutes sent to all homeowners.

For homeowners wishing to make improvements to their properties, the HOA now allows for "like for like" replacements without the need for prior Architectural Control Committee approval.

This means that homeowners may replace existing features—such as roofing, windows, doors, landscaping, and fencing—with materials and designs that are identical in type, style, and color to what is currently present.

All replacements must adhere to the community's aesthetic standards.

Homeowners are encouraged to notify the HOA of their intent to perform "like for like" work for record-keeping purposes, though formal approval will not be required.

Any modifications that deviate from the existing features, including changes in color, materials, or design, will still require the submission of an architectural request for review.

This policy aims to foster a harmonious community environment while giving homeowners the flexibility to maintain and improve their properties efficiently.

Plants and Flowers

Homeowners are permitted to place potted plants and annual flowers in their yards and on their porches without the need for prior approval from the HOA.

These additions should be kept neat and well-maintained to preserve the overall aesthetic of the community. While there are no restrictions on the types of potted plants or annuals used, homeowners are encouraged to select options that complement the existing landscape and to ascertain that no invasive species are being planted within the community.

Tree and shrub plantings or removals still require ACC approval unless they are replacements of "like for like."

HOLIDAY DECORATIONS

As we approach the holiday season, please keep in mind this policy adopted September 29, 2023:

Holiday Lighting may be put up 30 days prior to the date of the holiday and taken down 10 days following the holiday.

NEW TRUSTEE

Neal Nuttal nealnuttall@gmail.com has accepted an appointment to fill a vacancy on the HOA Board of Trustees. Please join the board in thanking him for his willingness to serve.

And consider lending your support to our community by serving on the board yourself. Three openings will be up for election in January.

WELCOME, NEW NEIGHBORS

Lynn and Diane Madsen recently purchased unit #136. Their primary residence is in Orem.

This is a homecoming for Diane who was raised in St. George as were generations of her ancestors.

The Madsens are the parents of four children and have 13 grandchildren, all in northern Utah.

Diane has taught school, volunteered in the PTA and directed a children's singing group. She loves music and dance, travel, scrapbooking, and especially playing with the kids and grandkids.

Lynn recently retired from a career with high tech companies. His business travels took him to every continent but Antarctica (still on his bucket list).

He enjoys reading, playing with technology gadgets and, in a reversal of typical roles, he's the one who provides computer/technology support for his children and grandchildren.

The Madsens are happy to have a home in Silver Creek and look forward to meeting new friends.

GRIEVING THE LOSS

Long-time Silver Creek resident Jeff Merriam died October 16th as a result of a tragic biking accident.

Jeff was an Air Force veteran and made his career in the home and business security industry.

The community extends our deep sympathy and love to Jeff's wife Tammy, to their children, and to their extended family.
